Resume Service

What does your resume say about you? Does it accurately portray your past career accomplishments and skills or does it give only a vague idea of what you've done and where you've been? Your resume is your ticket into the door of a potential employer. Make sure you're sending the right message.

A poorly written resume can...

-  Prevent someone from seeing your most important accomplishments, causing them to put your resume at the bottom of the stack.
-  Lead a potential employer to believe that you would produce "less than detailed" or substandard work.
-  Make a negative first impression which could cost you a job that you may actually be perfect for.

A well-written resume can...

-  Get the attention of potential employers and place you at the top of the list for interviews.
-  Showcase you in the most positive way and make the reader want to learn more about you.
-  Make a strong first impression, offering you a chance to get in the door so you can highlight your best attributes and accomplishments.

Regardless of what stage you are at in your career, Talent Train can help. For only \$79, our professional and trained instructors will take you through a process to create the resume that will lead to your new job. You will walk out of our workshop with a competitive resume and a new shot at career success.
